WHERE
SAFETY
MEETS
STRENGTH

WHO WE ARE?

Fortmax is a leading provider of high-quality, American-made safety products built to protect people, equipment, and infrastructure in high-traffic environments. We specialize in physical protection solutions — from heavy-duty bollards to custom safety components — engineered to perform where reliability matters most. Whether it's safeguarding EV charging stations, public assets, or industrial sites, Fortmax delivers with strength, precision, and speed.

Built by Americans. Protecting Americans.

Every product we manufacture reflects our commitment to safety, craftsmanship, and national infrastructure.

As industries like EV charging continue to grow, the need for smart, scalable protection is more critical than ever. We work directly with contractors, project managers, and deployment teams to deliver dependable solutions that are easy to install, built to spec, and ready to scale.

WHY FORTMAX?

- **Purpose-Built Protection**

Designed for real-world impact around EV chargers, pedestals, power units, and more.

- **Fast, Scalable Solutions**

Quick turnaround, flexible manufacturing, and dependable inventory for multi-site rollouts.

- **Modern + Trusted**

Clean, professional design backed by durable materials and field-tested performance.

- **Responsive Support**

We understand tight timelines, complex installs, and the need for consistency across every project. We don't just make protection products. We make your job easier, your sites safer, and your outcomes more predictable.
