

LED EDGE-LIT CANOPY WITH Q-BASE

► **DESIGN** - LED SQUARE EDGE-LIT CANOPY WITH Q-BASE has a built-in motion sensor base, allowing you to install the microwave PIR motion sensor. Die-cast aluminum housing with excellent heat dissipation along with an anti-glare PC lens provide many years of use. It is designed to operate on 120-277V circuits with a 0-10V dimmable driver.

► **VARIETY** - The fixtures are available in White and Black finishes.

► **COLOR AND POWER SELECTABLE** - You can choose either a 3,000K warm white, 4,000K cool white or 5,000K daylight color temperature, and change the power with a simple switch.

► **SURGE PROTECTION** - 6kV protects the fixture from voltage spikes and current surges.

► **INSTALLATION** - The fixture is Wet Locations rated and can be either surface mounted or pole mounted. Perfect commercial or industrial solution for parking garages, gas stations, stairwells, passageways, underpasses, and many other applications.

► **ADVANTAGES** - With calculated lifespan up to 150,000 hours, these fixtures are made to last decades under normal operation! ASD provides a 5-year limited warranty along with UL and DLC Premium certifications to guarantee top quality products and safety!

► **OPTIONS:**

MODELS WITH BATTERY BACKUP - The built-in battery backup provides 90 minutes of power in the case of an emergency.

Specifications	Models: ASD-09MW	Models: ASD-09IR	Models: ASD-09IR50
Operating voltage	10 - 15 V		
Operating current	< 30 mA	< 15 mA	< 30 mA
Mounting height	max 49.2 ft (15 m)	max 39.4 ft (12 m)	max 49.2 ft (15 m)
Detection radius	14.7 ft - 24.6 ft (4.5 m - 7.5 m)	14.7 ft - 22.9 ft (4.5 m - 7 m)	14.7 ft - 22.9 ft (4.5 m - 7 m)
Operating frequency	5.8 GHz ± 75 MHz	-	-
Transmitting power	< 0.3 mW	-	-

MICROWAVE MOTION SENSOR:

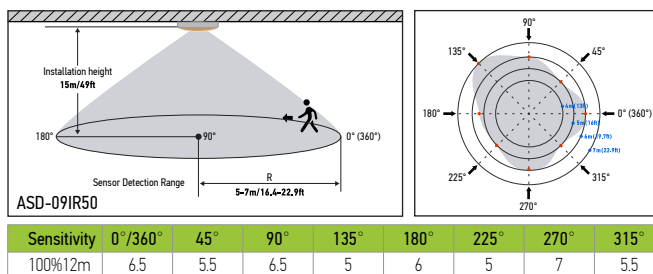

INFRARED MOTION SENSOR:

SENSOR USAGE RECOMMENDATIONS:

INDOOR RECOMMENDED LOCATIONS
Places where the temperature of the environment is well controlled.
Places where detecting the movement of people is a high priority.

INDOOR NOT RECOMMENDED LOCATIONS
Places where environment temp close to human body.
Places where PIR sensor lens can get covered.
Places higher than 39ft (unless you use 50ft PIR).

REMOTE CONTROL **ASD-06RC** sold separately

Button	Remarks	Button	Remarks	Button	Remarks
ON/OFF	ON/OFF Turn the sensor ON/OFF.	Auto	Auto Enter 'sensor mode' and perform previous settings.	Reset	Reset Enter 'sensor mode' and perform the default settings.
Scenes	Scenes Shows current settings saved in remote.	Start	Start Press this to begin scene setup.	Memory	Memory Saves the scene settings.
Apply	Apply Applies current scene settings to the fixture.	M H	Mounting height Adjust detection area/sensitivity levels according to real installation situations, higher or lower.	Send	Send Memorize and send out the previous setting of individual parameters.
%	Detection range Also known as 'sensitivity', 100 % means the highest sensitivity and longest distance. Use this button and the + - buttons to adjust.	Daylight sensor	Daylight sensor The preset lux level at which motion will be detected. Use this button and the + - buttons to adjust.	Stand-by dimming	Stand-by dimming After hold time, the light will dim from 100 % to optional standby dimming levels. Use this button and the + - buttons to adjust.
⌚	Hold time The period that light will stay illuminated 100 % after no motion is detected. Use this button and the + - buttons to adjust.	Up	Up The main functional buttons to adjust the factors to desired level. Press + - button to dim light directly auto in non-detection mode.	Stand-by period	Stand-by period The period after holdtime, during which the light keeps standby dimming level. Use this button and the + - buttons to adjust.
CCT	CCT selectable Not applicable to this product.	Down	Down	POWER	Power Adjust brightness in both ON/OFF mode & sensor mode, minimum 10%, max 100%, each time this button is pressed it changes by 5%.
○	Reserved button Not applicable to this product.	Daylight harvesting	Daylight harvesting Daylight harvesting function enabled or disabled.	Test	Test button Press this button to test the sensor; it will temporarily change the hold time to 2s. This setting cannot be saved.

For most up-to-date spec sheets please refer to asd-lighting.com

LED EDGE-LIT CANOPY WITH Q-BASE

WITH DUSK/DAWN FUNCTION:

1. With insufficient ambient brightness, sensor turns on light and keeps it at standby dimming level even if there is no motion or presence.
2. When sensor detects motion or presence it will bring the light level up to 100 %.
3. After motion is no longer detected, fixture remains at 100 % for hold time.
4. After the preset hold time period, it will dim to the standby dimming level and maintain it indefinitely.
5. With sufficient ambient brightness, sensor will turn OFF light automatically.

WITH DAYLIGHT DISABLED:

1. Sensor turns ON light when motion is detected.
2. Light will stay on after detecting motion for the desired hold time.
3. Sensor dims light to standby dimming level after hold time if there is still no motion.
4. Sensor turns OFF light after standby period.

WITH DAYLIGHT THRESHOLD:

1. With sufficient daylight, the light remains OFF even after motion is detected.
2. With insufficient daylight, the sensor turns light ON when motion is detected.
3. After there's no motion detected, the sensor keeps light ON 100 % for holdtime.
4. After holdtime, sensor dims light to standby dimming level for standby period. If the standby period has been set as 0s, sensor turns light OFF automatically after holdtime.
5. The sensor turns OFF light automatically after the standby period when there's no motion detected.

DAYLIGHT HARVESTING:

1. When the ambient brightness is lower than the preset lux level, the sensor will automatically turn on the light and adjust the dimming according to changes in ambient brightness. As it gets darker outside, the fixtures will brighten, and as it gets brighter outside, the fixtures will dim.
2. When the ambient brightness exceeds the preset lux level, the light will turn OFF.

MICROWAVE MOTION SENSOR:

To avoid blocking the microwave emission, the microwave sensor can not be covered with metal materials, be sprayed with a coating of metal components, or have attached metal material or stickers etc.

The distance between the antenna and the glass (dielectric material) should be no less than 0.4 ft when the sensor is within the glass lampshade. Otherwise, the microwave motion sensor will not penetrate the glass easily.

Avoid placing the sensor inside a metal chamber, this may cause a mis-trigger.

The sensor should not be placed in a small confined space. To avoid increasing the sensor detection range or abnormal operation, the sensor should be kept away from large areas of metal and glass reflectors (separation distance at least 3.3 ft). Reduce the detection area setting.

To avoid affecting the microwave signal transmission, the microwave antenna should be higher than the surrounding metal surface.

Any vibration or movement may trigger the sensor. Ensure the sensor is far from any constant movement.

At least 2 m/6.5 ft distance between microwave sensors; 1.5 m/4.9 ft between the sensor and other wireless devices such as routers to avoid possible radio interference.

DAYLIGHT HARVESTING SETTING:

1. Adjust "daylight" value higher than 50lux.
2. Preset "standby period" 0S.
3. Press "daylight harvesting" button on remote control to activate.

For most up-to-date spec sheets please refer to asd-lighting.com

LED EDGE-LIT CANOPY WITH Q-BASE

BUILT-IN BATTERY BACK-UP INFORMATION

Specifications	
Input voltage	100-347 Vac 50/60 Hz
Voltage	120 V
Input current	618 mA
Output current	70 mA
Output power	8W
Lumens	1,310 lm
Emergency time	90 minutes
Indicator light	Illuminated test switch
Battery	LiFePO4 battery - 6.4 V/3200 mAh
Battery charging current	440 mA
Charging time	24 hours

BUILT-IN PHOTOCELL INFORMATION

Specifications	
Light level to turn ON	≤ 80 lux (7.4 fc)
Light level to turn OFF	≥ 150 lux (13.9 fc)
Operating temperature	-40°F to 122°F (-40°C to 50°C)

The dusk-to-dawn sensor automatically turns the fixture off during daylight hours.

STANDARD OPERATION DISPLAY STATUS:

Button	Remarks
 ON	Charging mode, Battery is fully charged, AC power is ON
 OFF	Emergency mode, Battery is discharging, AC power is OFF

INSTALLATION GUIDE

IMPORTANT SAFETY INFORMATION:

Please read all the instructions below before installation!

- ▶ Make sure that the supply voltage corresponds to the rated product voltage.
- ▶ The product must be installed by a qualified electrician in accordance with the National Electrical Code and corresponding local codes.
- ▶ If the product is damaged, do not use it.

⚠ WARNING

Risk of personal injury – read and follow all warnings and installation instructions. Keep or give to the owner for future reference.

Risk of cuts: Wear gloves to prevent cuts or abrasions when removing from carton, handling, installing, and maintaining this product.

Risk of electric shock: This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Risk of Fire: Minimum 194°F supply conductors. Consult a qualified electrician to ensure correct branch circuit conductor.

ASD® assumes no responsibility for claims arising out of improper or careless installation or handling of this product.

POLE MOUNTING INSTALLATION:

1. Adjust color temperature and power (if needed) by unscrewing the cap and set switches to needed values in the middle of the fixture for 70W and 100W models or on the side of a housing for 50W and 80W models.
2. Thread the wires into the pipe and connect them with terminal caps.
3. Screw the pipe into the fixture. Use NPT3/4" pipe.

For most up-to-date spec sheets please refer to asd-lighting.com

LED EDGE-LIT CANOPY WITH Q-BASE

SURFACE MOUNT WITH A MOUNTING PLATE:

1. Remove the securing screw out of the mounting plate, detach the mounting plate from the fixture housing and secure the plate to a j-box on the ceiling using anchors and self-tapping screws.
2. Adjust color temperature and power (if needed) by unscrewing the cap and set switches to needed values in the middle of the fixture for 70W and 100W models or on the side of a housing for 50W and 80W models.
3. Use hanger on the mounting plate to hold the fixture in place and connect the wires and secure connection to the Junction box in the ceiling. Slide the fixture into the mounting plate clamps and secure it with a screw.

MOTION SENSOR INSTALLATION:

ASD-09MW ASD-09IR ASD-09IR50 sold separately

1. Unscrew the sensor base cap.
2. Insert and twist the sensor until it is tight on the base surface.
